## REASONS FOR ALLOWANCE

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on **November 26, 2003** has been entered.
2. This Office Action is also in response to applicant's amendment filed on November 26, 2003, which has been entered.
3. By this amendment, the applicant has canceled claims 1-35, 37-40, has amended claim 36 and has newly added claims 41 and 42.
4. Claims 36, 41 and 42 remain pending in this application.

### *Reasons For Allowance*

5. The following is an examiner's statement of reasons for allowance: of the prior art references considered, none has disclosed a method for generating image data for forming a hologram wherein the method comprises the steps of generating a sequence of two-dimensional images depicting a first object *viewed from different angles*, generating a sequence of images depicting a *stereo model* of a second object *viewed from different angles* and combining the sequence of two dimensional images and the sequence of images of stereo model by *pasting* a respect two dimensional image onto a portion of a corresponding image of the stereo model and generating a *parallax image train* from the combined images including the stereo model with the first object pasted thereon *viewed from different angles*.

Art Unit: 2872

The prior art reference **US patent issued to Tabata (PN. 6,111,597)** teaches a method for forming stereo image by inserting a background image to a corresponding stereo model image however this reference does not teach to make the background image a sequence of two dimensional images depicting a background object from different angle of view.

The prior art reference **US patent application issued to Yano et al (US 2002/0113865)** teaches an image processing method for creating three dimensional image model from a plurality of object images having overlapped field of view that are photographed from different viewpoints. However this reference does not teach to paste a sequence of images depicting a first object viewing from different viewpoints to a sequence of three dimensional image model viewed also from different viewpoints to form a parallax image train.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Audrey Y. Chang whose telephone number is 571-272-2309. The examiner can normally be reached on Monday-Friday (8:00-4:30), alternative Mondays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew Dunn can be reached on 571-272-2312. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
